Subject FW: figure

Hi everyone, Please see the attached figures showing the rapidly deteriorating areas identified within the Aerovox Facility. Let me know if there are any questions.

Thanks, Mike

Note: Inspections have not been performed to identify all possible hazardous areas within the Facility. Rather, this figure shows hazardous areas identified during the course of performing sampling operations. Because not all hazards have been identified, and the building continues to deteriorate, extreme caution is required in all areas of the Facility.
